Construction Site Safety Inspection Checklist

A **construction site safety inspection checklist** is an essential tool designed to ensure all safety protocols are followed to prevent accidents and injuries. It systematically evaluates hazards, equipment, and worker compliance to maintain a secure work environment. Regular use of this checklist helps identify potential risks early and promotes overall site safety management.

Checklist

Site Conditions

- ☐ Access ways clear and free from obstruction
- ☐ Good housekeeping maintained
- ☐ Adequate lighting provided

Personal Protective Equipment (PPE)

- ☐ Hard hats worn by all personnel
- ☐ High-visibility clothing provided and used
- ☐ Appropriate foot protection in use

Tools and Equipment

- ☐ Tools/equipment inspected before use
- ☐ Guards and safety devices in place
- ☐ Electrical equipment properly grounded

Hazard Controls

- ☐ Fall protection used as required
- ☐ Scaffolding, ladders in good condition
- ☐ Proper signage on hazardous areas

Emergency Procedures

- ☐ First aid kit available and accessible
- ☐ Emergency contact numbers displayed
- ☐ Fire extinguishers inspected and accessible
