

Survey Questionnaire for Academic Research Studies

A **survey questionnaire** is a vital tool in academic research studies, designed to collect standardized data from participants efficiently. It ensures the systematic gathering of information to analyze trends, opinions, or behaviors relevant to the study's objectives. Employing well-constructed questionnaires enhances the validity and reliability of research findings.

Sample Survey Questionnaire

General Information

1. Name (Optional):

2. Age:

3. Gender:

Please select

Survey Questions

4. How often do you participate in academic research studies?

☐ Often

☐ Sometimes

☐ Rarely

☐ Never

5. What motivates you to participate in research studies? (Select all that apply)

☐ Personal Interest

☐ Academic Requirement
