Quality Control Checklist for Garment Industry

Implementing a **quality control checklist** in the garment industry ensures every product meets established standards before reaching customers. This checklist helps identify defects, maintain consistency, and improve overall production efficiency. Adhering to these controls reduces returns and enhances brand reputation.

General Information

Order Number		Style	
Inspector Name		Date	
Factory Name		Batch/Lot Number	

Checklist

Item	Description	Pass	Fail	Comments
1. Fabric Quality	No holes, stains, or color shading; matches approved sample	☐	☐	
2. Sewing Quality	No loose threads, skipped stitches, proper seam allowance	☐	☐	
3. Measurement/Size	Matches specified size chart/tolerances	☐	☐	
4. Color Fastness	Dye does not fade or bleed after wash/rub test	☐	☐	
5. Trims & Accessories	Buttons/zippers secure, correct type, properly attached	☐	☐	
6. Finishing	Neat, clean, pressed, free from stains or marks	☐	☐	
7. Labeling & Tags	Correct placement, spelling, content, and durability	☐	☐	
8. Packing	Proper folding, correct packaging, correct quantity per carton	☐	☐	

Defect Classification

- **Critical:** Defects that make the garment unsafe or non-compliant.
- **Major:** Defects that affect the appearance, performance, or function.
- **Minor:** Defects that slightly impact appearance or function but are generally acceptable.
