

# Hazard Log Form Sample for Chemical Laboratories

The **hazard log form** sample for chemical laboratories is designed to systematically record and track potential safety risks in lab environments. This template ensures comprehensive documentation of hazards, helping to maintain a secure workspace. Utilizing this form promotes proactive risk management and compliance with safety standards.

## Laboratory Information

Laboratory Name	
Location/Room Number	
Responsible Person	
Date	

## Hazard Log

ID	Hazard Description	Potential Consequences	Risk Assessment (Likelihood / Severity)	Control Measures	Responsible Person	Date Identified	Status (Open/Closed)	Comments/Follow Up

## Instructions

1. Fill in laboratory information at the top of the form.
2. For each identified hazard, complete a new line in the hazard log table.
3. Specify risk assessments and relevant control measures for effective mitigation.
4. Update status and comments as hazards are addressed or monitored.
5. Review and update the log regularly for ongoing safety compliance.
