

# Customizable Inventory Report

Our **customizable inventory report** for e-commerce platforms allows businesses to track stock levels, monitor sales trends, and manage product availability efficiently. Tailored to suit specific needs, it enhances decision-making and streamlines inventory management. This powerful tool ensures accurate reporting to optimize supply chain operations and improve customer satisfaction.

## Inventory Overview (Sample)

| Product Name                 | SKU      | Category    | Stock Level | Reorder Point | Sales (Last 30 Days) | Status       |
