

# Google Sheets Invoice Template with Multiple Currencies

Efficiently manage your billing with our **Google Sheets invoice template** that supports multiple currencies, making international transactions seamless. This customizable template helps you track payments and generate professional invoices quickly. Ideal for freelancers and businesses dealing with clients worldwide.

## Features

- Supports multiple currencies (USD, EUR, GBP, JPY, and more)
- Customizable invoice fields (Client name, Address, Date, etc.)
- Automatic currency conversion rates (manual input or integrated API option)
- Professional formatting and branding
- Easy itemization of products and services
- Payment tracking and status management
- Works with Google Sheets for real-time collaboration

## How It Works

1. Make a copy of the template in your Google Drive.
2. Customize your company information and logo.
3. Select the required currency for each invoice.
4. Enter your line items, prices, and quantities.
5. The template automatically calculates totals and taxes in your chosen currency.
6. Download as PDF or share directly with your client.
