

Health and Safety Survey Questions for Manufacturing Employees

Conducting a **health and safety survey** for manufacturing employees helps identify workplace risks and ensures compliance with safety regulations. These surveys gather essential feedback on employees' awareness and experiences regarding safety protocols. Implementing the insights promotes a safer work environment and reduces accidents.

Sample Survey Questions

1. How familiar are you with our company's health and safety policies?
2. Have you received adequate training on workplace safety procedures?
3. Do you feel comfortable reporting safety hazards to management?
4. Are emergency exits and safety equipment clearly marked and easily accessible?
5. Have you witnessed or experienced any safety incidents in the past 12 months?
6. How effectively do you think management responds to safety concerns?
7. What improvements would you suggest to enhance workplace safety?
8. Are personal protective equipment (PPE) and safety gear readily available and in good condition?
9. On a scale of 1 to 5, how safe do you feel while performing your job duties?
10. Do you have any suggestions for additional safety training topics?
