

# Product Performance Assessment Form

## Electronics - Sample

The **product performance assessment form** sample for electronics provides a structured way to evaluate device functionality and reliability. It enables systematic testing of key features, ensuring compliance with industry standards. Using this form helps identify potential issues early, improving product quality and customer satisfaction.

### Product Information

Product Name		Model Number	
Serial Number		Date of Assessment	
Assessor Name			

### Performance Criteria

Test Item	Requirement / Standard	Test Method	Result (Pass/Fail)	Remarks
Power On/Off Function	Device powers up and shuts down as intended	Button/Remote operation		
Display/Screen Quality	No dead pixels; clear output	Visual inspection		
Input/Output Ports	All stated ports functional	Connect peripheral devices		
Battery Performance	Meets minimum operation time (specify)	Battery run-down test		
Wireless Connectivity	Stable Wi-Fi/Bluetooth operation	Connection test via paired device		
Sound Quality	Speaker output clear and distortion-free	Audio playback test		

### Defects / Issues Observed

Description of Issue	Severity	Recommended Action
	<div>Minor</div>	

### Final Assessment & Comments

Overall Result	<div><input type="radio"/> Pass <input type="radio"/> Fail</div>
Assessor Comments	

Note: Attach additional reports or test data as required.
