

Product Evaluation Questionnaire for Software Applications

A **product evaluation questionnaire** for software applications helps gather user feedback on functionality, usability, and performance. It enables developers to identify strengths and areas for improvement. This structured approach ensures more effective software development and enhanced user satisfaction.

User Information

Name:

Email:

Role (e.g, user, developer, admin):

Functionality

How well does the software meet your needs?

 Excellent ▾

Are all the required features available and working?

Yes
 No

Comments:

Usability
