This **blood donation apheresis consent form sample** ensures donors are fully informed about the apheresis procedure, its benefits, and potential risks. It provides clear, concise information to facilitate voluntary and knowledgeable consent. Using this form helps maintain ethical standards and donor safety in blood donation processes.

Donor Information

Full Name:

Date of Birth:

Contact Number:

Procedure Information

Apheresis is a procedure where blood is drawn from your body and one or more components, such as plasma or platelets, are separated and collected. The remaining blood is then returned to your body. This procedure is generally safe, but as with any medical procedure, risks may exist. Possible risks include temporary tingling, low blood calcium, bruising, or rarely, infection or allergic reaction.

Consent

I acknowledge that I have read and understood the explanation of the apheresis procedure, its benefits, and potential risks. I have had the opportunity to ask questions, and all my questions have been answered to my satisfaction.

I voluntarily agree to undergo the apheresis blood donation procedure.

☐ I consent to participate in the apheresis blood donation process.
