

Software User Experience Survey for Accessibility Feedback

Our **software user experience survey** is designed to gather valuable feedback on accessibility, ensuring that all users can effectively interact with our platform. By focusing on usability and inclusivity, we aim to identify barriers and improve the overall experience. Your insights help us create a more accessible and user-friendly software environment.

General Information

Name (optional):

Email (optional):

Accessibility Feedback

Do you use any assistive technologies? *

--Please select--

Have you encountered any accessibility obstacles while using our software?

How would you rate the overall usability of our platform for your needs?

--Select--

What changes would improve the accessibility of our software?
