

Registration Form Sample Excel with Dropdown Menus

A **registration form sample excel** with dropdown menus simplifies data entry by providing predefined options for users. This format ensures accuracy and consistency in responses while enhancing the overall user experience. It is ideal for efficiently collecting registration information in various applications.

Sample Table Structure

Name	Email	Gender (Dropdown: Male, Female, Other)	Country (Dropdown: List of Countries)	Course (Dropdown: Excel, Word, PowerPoint)
<input type="text"/>	<input type="text"/>	Select <input type="button" value="▼"/>	Select <input type="button" value="▼"/>	Select <input type="button" value="▼"/>

How to Create Dropdown Menus in Excel

1. Select the cell(s) where you want the dropdown.
2. Go to **Data > Data Validation**.
3. Under **Allow**, select **List**.
4. Enter your list values separated by commas (e.g., Male, Female, Other) or select a range.
5. Click **OK**.
