

Environmental Risk Assessment Questionnaire for Construction

The **environmental risk assessment questionnaire** for construction evaluates potential ecological impacts associated with building projects. It helps identify hazards and ensures compliance with environmental regulations to minimize damage. This tool supports sustainable development by promoting responsible construction practices.

Project Information

Project Name:

Location:

Start Date:

Environmental Aspects

Does the project involve any of the following? (Check all that apply)

☐ Land clearing

☐ Impact on water bodies

☐ Proximity to protected areas

☐ Significant waste generation

☐ Air emissions

Risk Management

Describe the measures in place to minimize environmental risks:

Are environmental monitoring procedures established?

☐ Yes

☐ No

Regulatory Compliance

Have all necessary environmental permits been obtained?

☐ Yes

☐ No

Submit Assessment
