

Computer Programming Skills Assessment Form

This **computer programming skills assessment** form sample is designed to evaluate the coding proficiency and technical knowledge of candidates effectively. It includes various sections to test problem-solving abilities, language expertise, and practical programming tasks. Using this form ensures a standardized approach to assessing programming skills in recruitment or training processes.

Candidate Information

Name:	<input type="text"/>
Date:	<input type="text"/>
Position Applied For:	<input type="text"/>

Programming Languages Proficiency

Language	Not Familiar	Beginner	Intermediate	Advanced
Python	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Java	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
C/C++	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
JavaScript	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other (specify)	<input type="text"/>			

Problem Solving & Algorithms

Describe your approach to solving a new or unfamiliar algorithmic problem:

Practical Programming Task

Task: Write a function in your preferred programming language to reverse a string.
(Please include both code and brief explanation below.)

Additional Technical Skills

List any additional programming tools, frameworks, or databases you are familiar with:
