

Hazard Log Form Sample for Construction Projects

A **hazard log form sample** is an essential document used in construction projects to systematically identify, assess, and track potential safety risks. It helps ensure compliance with safety regulations and promotes proactive hazard management. Utilizing this form enhances project safety and minimizes workplace accidents.

| Hazard ID | Date Identified | Description of Hazard | Location | Risk Assessment (Likelihood/Severity) | Proposed Control Measures | Person Responsible | Status | Remarks |
|-----------|-----------------|-----------------------------|---------------------------|---------------------------------------|---|--------------------|---------|----------------------|
| HZD-001 | 2024-06-20 | Uncovered floor openings | 2nd floor, near stairwell | High/Severe | Install guardrails and warning signage | Site Supervisor | Open | |
| HZD-002 | 2024-06-21 | Exposure to falling objects | Main construction area | Medium/Moderate | Provide hard hats, install debris netting | Safety Officer | Ongoing | Partially mitigated |
| HZD-003 | 2024-06-22 | Electrical cables exposed | Ground floor, west wing | High/Severe | Cover cables and restrict access | Electrician | Closed | Completed 2024-06-23 |
