

Whole Genome Sequencing Consent Form Sample

This **whole genome sequencing consent form sample** provides a clear template to inform participants about the scope, risks, and benefits of genome sequencing. It ensures ethical standards are met by detailing data usage, privacy protections, and participant rights. Using this sample can facilitate informed decision-making for individuals undergoing genomic analysis.

Consent Form

Participant Information

Full Name:

Date of Birth:

Contact Information:

Purpose of Sequencing

The purpose of this study is to analyze your whole genome in order to better understand genetic contributions to health and disease. Your genome data may be used for research, diagnostic, or clinical purposes as explained below.

Potential Risks and Benefits

- **Risks:** Potential for psychological distress, misuse of data, or inadvertent discovery of sensitive health information.
- **Benefits:** May provide insights into your health, inherited conditions, and potential predispositions.

Data Usage and Privacy

- Your genetic data will be stored securely and confidentially.
- Only authorized personnel will have access to your information.
- Data may be shared with researchers, but all shared data will be de-identified.

Participant Rights

- Participation is voluntary.
- You may withdraw your consent at any time without penalty.
- You may request access to your data and results.

Consent Confirmation

By signing below, you confirm that you have read and understood the information provided and consent to participate in whole genome sequencing.
