WordPress Contact Form Sample Shortcode

Integrate a **WordPress contact form** easily using a simple shortcode to enhance user interaction on your website. This sample shortcode allows seamless insertion of customizable contact forms without coding. Improve communication with visitors by embedding forms directly into your pages or posts.

Sample Shortcode

```
[contact-form-7 id="1234" title="Contact form 1"]
```

Usage Instructions

1. Install and activate your preferred contact form plugin (such as **Contact Form 7**).
2. Create or customize your contact form in the plugin settings.
3. Copy the shortcode provided for your form, similar to the example above.
4. Paste the shortcode into any page or post in your WordPress editor.
5. Publish or update the page to display your form.
